

K.R. MANGALAM UNIVERSITY
THE COMPLETE WORLD OF EDUCATION

Operation System Assignment

Subject: Operating System

5th Semester

Faculty Name: Dr. Saneh Lata Yadav

Submitted By: Utsav Ratan

Roll No: 2401010046

Section: B. Tech CSE Core (B)

Part A – Basic Linux Commands

Description: -

This part covers basic navigation, directory creation, and checking directory contents.

Task 1 – Display the current working directory

Command:

```
pwd
```

Output:

```
/home/xylanxd
```

Explanation: Displays the absolute path of the current working directory.

Task 2 – Display the contents of the current directory

Command:

```
ls
```

Output:

```
os_system_calls
```

Explanation: Lists the visible files and directories in the current directory.

Task 3 – Display all files, including hidden files

Command:

```
ls -a
```

Output:

```
. .. .bash_logout .bashrc .cache .config .landscape .local .motd_shown .profile  
os_system_calls
```

Explanation: Lists all directory entries, including hidden files.

Task 4 – Create Linux_Assignment directory

Command:

```
mkdir Linux_Assignment
```

Output:

```
No output.
```

Explanation: Creates a new directory named Linux_Assignment.

Task 5 – Enter Linux_Assignment and verify the path

Command:

```
cd Linux_Assignment  
pwd
```

Output:

```
/home/xylanxd/Linux_Assignment
```

Explanation: Changes into the directory and prints its path.

Task 6 – Create the required subdirectories

Command:

```
mkdir Documents Programs Reports Backup
```

Output:

```
No output.
```

Explanation: Creates four subdirectories inside Linux_Assignment.

Task 7 – List the created directories

Command:

```
ls
```

Output:

Backup Documents Programs Reports

Explanation: Lists the contents and verifies the four directories were created.

```
xylanxd@LAPTOP-U3VEKHRD x + v
xylanxd@LAPTOP-U3VEKHRD:~/os_system_calls$ cd ~
xylanxd@LAPTOP-U3VEKHRD:~$ pwd
/home/xylanxd
xylanxd@LAPTOP-U3VEKHRD:~$ ls
os_system_calls
xylanxd@LAPTOP-U3VEKHRD:~$ ls -a
.  ..  .bash_logout  .bashrc  .cache  .config  .landscape  .local  .motd_shown  .profile  os_system_calls
xylanxd@LAPTOP-U3VEKHRD:~$ mkdir Linux_Assignment
xylanxd@LAPTOP-U3VEKHRD:~$ cd Linux_Assignment
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ pwd
/home/xylanxd/Linux_Assignment
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ mkdir Documents Programs Reports Backup
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ ls
Backup Documents Programs Reports
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ |
```

Task 1-7

Part B – File and Directory Operations

Description: -

This part covers creating files, writing content, copying, renaming, moving, and checking files.

Task 8 – Enter Documents and create three files

Command:

```
cd Documents  
touch file1.txt file2.txt file3.txt
```

Output:

No output.

Explanation: Creates three empty text files in Documents.

Task 9 – List the files

Command:

```
ls
```

Output:

```
file1.txt file2.txt file3.txt
```

Explanation: Lists the files created in Documents.

Task 10 – Write the required text to file1.txt

Command:

```
echo "Operating Systems" > file1.txt  
echo "Linux Command Practice" >> file1.txt  
echo "KRMU" >> file1.txt
```

Output:

No output.

Explanation: Writes the three required lines into file1.txt.

Task 11 – Display file1.txt

Command:

```
cat file1.txt
```

Output:

```
Operating Systems  
Linux Command Practice  
KRMU
```

Explanation: Displays the contents of the file.

Task 12 – Copy file1.txt to Backup

Command:

```
cp file1.txt ../Backup/
```

Output:

No output.

Explanation: Copies file1.txt into the Backup directory.

Task 13 – Rename file2.txt to student.txt

Command:

```
mv file2.txt student.txt
```

Output:

No output.

Explanation: Renames file2.txt to student.txt.

Task 14 – Move file3.txt to Reports

Command:

```
mv file3.txt ../Reports/
```

Output:

No output.

Explanation: Moves file3.txt into the Reports directory.

Task 15 – Verify the Backup directory

Command:

```
ls ../Backup
```

Output:

file1.txt

Explanation: Checks that the copied file is present in Backup.

```
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ cd Documents
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ touch file1.txt file2.txt file3.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ls
file1.txt file2.txt file3.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cd Documents
-bash: cd: Documents: No such file or directory
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ touch file1.txt file2.txt file3.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ls
file1.txt file2.txt file3.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ echo "Operating Systems" > file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ echo "Linux Command Practice" >> file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ echo "KRMU" >> file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cat file1.txt
Operating Systems
Linux Command Practice
KRMU
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cp file1.txt ../Backup/
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ mv file2.txt student.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ mv file3.txt ../Reports/
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ls ../Backup
file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ |
```

Task 8-15

Part C – Searching and Text Processing

Description: -

This part uses commands to count, view, search, and find text files.

Task 16 – Count lines, words, and characters in file1.txt

Command:

```
wc file1.txt
```

Output:

```
3 6 46 file1.txt
```

Explanation: Shows the number of lines, words, and characters in the file.

Task 17 – Display the beginning of the file

Command:

```
head file1.txt
```

Output:

```
Operating Systems  
Linux Command Practice  
KRMU
```

Explanation: Displays the first part of the file.

Task 18 – Display the end of the file

Command:

```
tail file1.txt
```

Output:

```
Operating Systems  
Linux Command Practice  
KRMU
```

Explanation: Displays the last part of the file.

Task 19 – Search for the word Linux

Command:

```
grep "Linux" file1.txt
```

Output:

```
Linux Command Practice
```

Explanation: Searches the file and prints the line containing Linux.

Task 20 – Find all .txt files under Linux_Assignment

Command:

```
cd ..  
find . -name "*.txt"
```

Output:

```
./Documents/file1.txt  
./Documents/student.txt  
./Documents/students.txt  
./Backup/file1.txt  
./Reports/file3.txt
```

Explanation: Searches recursively for files whose names end with .txt.

```
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ wc file1.txt
 3  6 46 file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ head file1.txt
Operating Systems
Linux Command Practice
KRMU
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ tail file1.txt
Operating Systems
Linux Command Practice
KRMU
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ grep "Linux" file1.txt
Linux Command Practice
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cd ..
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ find . -name "*.txt"
./Documents/file1.txt
./Documents/student.txt
./Reports/file3.txt
./Backup/file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment$ |
```

Task 16-20

Part D – File Permissions

Description: -

This part demonstrates file permissions and changing permissions with chmod.

Task 21 – Display detailed file information

Command:

```
cd Documents
ls -l
```

Output:

```
total 4
-rw-r--r-- 1 xylanxd xylanxd 46 Sep 26 14:18 file1.txt
-rw-r--r-- 1 xylanxd xylanxd 0 Sep 26 14:17 student.txt
```

Explanation: Displays file permissions, ownership, size, and modification details.

Task 22 – Change file1.txt permissions to 644

Command:

```
chmod 644 file1.txt
```

Output:

No output.

Explanation: Sets read/write permission for the owner and read-only permission for group and others.

Task 23 – Verify the new permission

Command:

```
ls -l file1.txt
```

Output:

```
-rw-r--r-- 1 xylanxd xylanxd 46 Sep 26 14:18 file1.txt
```

Explanation: Checks that file1.txt now has permission mode 644.

Task 24 – Explain the permission string -rwxr-xr--

Explanation: The first - means regular file. rwx gives the owner read, write, and execute permission; r-x gives the group read and execute permission; r-- gives others read-only permission. The numeric form is 754.

```
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ls -l
total 4
-rw-r--r-- 1 xylanxd xylanxd 46 Sep 26 14:18 file1.txt
-rw-r--r-- 1 xylanxd xylanxd  0 Sep 26 14:17 student.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ chmod 644 file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ls -l file1.txt
-rw-r--r-- 1 xylanxd xylanxd 46 Sep 26 14:18 file1.txt
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ |
```

Task 21-24

Part E – System Information Commands

Description: -

This part displays basic information about the Linux system, user, date, storage, memory, and uptime.

Task 25 – Display Linux system information

Command:

```
uname -a
```

Output:

```
Linux LAPTOP-U3VEKHRD 6.18.33.2-microsoft-standard-WSL2 #1 SMP PREEMPT_DYNAMIC Thu Jun 18  
21:54:43 UTC 2026 x86_64 GNU/Linux
```

Explanation: Displays kernel, machine, architecture, and system information.

Task 26 – Display the current user

Command:

```
whoami
```

Output:

```
xylanxd
```

Explanation: Shows the username of the current user.

Task 27 – Display the current date and time

Command:

```
date
```

Output:

```
Sat Sep 26 14:25:48 UTC 2026
```

Explanation: Displays the current system date and time.

Task 28 – Display disk usage

Command:

```
df -h
```

Output:

See Screenshot 2. The command displayed filesystem size, used space, available space, and usage percentage.

Explanation: Shows disk-space information in a human-readable format.

Task 29 – Display memory usage

Command:

```
free -h
```

Output:

```
Mem: 7.6Gi 577Mi 6.9Gi 3.5Mi 267Mi 7.0Gi  
Swap: 2.0Gi 0B 2.0Gi
```

Explanation: Shows total, used, free, shared, cached, and available memory in human-readable units.

Task 30 – Display system uptime

Command:

```
uptime
```

Output:

```
14:27:17 up 2:00, 1 user, load average: 0.07, 0.05, 0.01
```

Explanation: Shows how long the system has been running and the load averages.

```

xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ uname -a

Task 29-30

Part F – Process Management

Description: -

This part demonstrates viewing processes, running a background process, finding its PID, and terminating it.

Task 31 – Display current processes

Command:

```
ps
```

Output:

```
PID TTY          TIME CMD
322 pts/0        00:00:00 bash
1792 pts/0        00:00:00 ps
```

Explanation: Displays the processes associated with the current terminal session.

Task 32 – Display all running processes

Command:

```
ps aux
```

Output:

Full process table displayed in the terminal; see Screenshot 1.

Explanation: Displays processes for all users with detailed information.

Task 33 – Start a background sleep process

Command:

```
sleep 100 &
```

Output:

```
[1] 1889
```

Explanation: Runs sleep for 100 seconds in the background so its PID can be checked.

Task 34 – Find the PID of the sleep process

Command:

```
pgrep sleep
```

Output:

```
1889
```

Explanation: Finds the process ID of the running sleep process.

Task 35 – Terminate the sleep process

Command:

```
kill 1889
```

Output:

No output.

Explanation: Sends a termination signal to the process with PID 1889.

Task 36 – Verify that the process has ended

Command:

```
pgrep sleep
```

Output:

No output.

Explanation: Checks that no sleep process is still running.

```

xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ ps
  PID TTY          TIME CMD

Tasks 31-32

```

xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ sleep 100 &
[1] 1889
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ |

```

Task 33

```

xylanxd@LAPTOP-U3VEKHRD:~$ pgrep sleep
1889
xylanxd@LAPTOP-U3VEKHRD:~$ kill 1889
xylanxd@LAPTOP-U3VEKHRD:~$ pgrep sleep
xylanxd@LAPTOP-U3VEKHRD:~$ |

```

Task 34-36

Part G – Pipes and Text Processing

Description: -

This part demonstrates creating a list of names and using wc, sort, reverse sorting, and pipes.

Task 37 – Create students.txt

Command:

```
printf "Aman\nRiya\nRahul\nPriya\nNeha\nKaran\n" > students.txt
```

Output:

No output.

Explanation: Creates students.txt and writes six student names into it.

Task 38 – Display students.txt

Command:

```
cat students.txt
```

Output:

```
Aman
Riya
Rahul
Priya
Neha
Karan
```

Explanation: Displays all names stored in the file.

Task 39 – Count the number of students

Command:

```
wc -l students.txt
```

Output:

```
6 students.txt
```

Explanation: Counts the number of lines, with one student name per line.

Task 40 – Sort the names alphabetically

Command:

```
sort students.txt
```

Output:

```
Aman
Karan
Neha
Priya
Rahul
Riya
```

Explanation: Sorts the names in ascending alphabetical order.

Task 41 – Sort the names in reverse order

Command:

```
sort -r students.txt
```

Output:

```
Riya
Rahul
Priya
Neha
Karan
Aman
```

Explanation: Sorts the names in descending alphabetical order.

Task 42 – Use pipes with sort and wc

Command:

```
cat students.txt | sort
cat students.txt | wc -l
```

Output:

```
Aman
Karan
Neha
Priya
Rahul
Riya
```

6

Explanation: Passes the output of one command directly to another command using the pipe operator.

```
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ printf "Aman\nRiya\nRahul\nPriya\nNeha\nKaran\n" > students.txt
[1]+  Terminated                  sleep 100
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cat students.txt
Aman

```

Task 42

Part H – Linux Lab Folder and Python Programs

Description: -

This part creates a small lab folder structure, Python files, a simple program, a backup archive, and checks the folder size.

Task 43 – Create the OS_Lab folder structure

Command:

```
mkdir -p OS_Lab/Programs/C
mkdir -p OS_Lab/Programs/Python
mkdir -p OS_Lab/Assignments
mkdir -p OS_Lab/Backup
find OS_Lab -type d
```

Output:

```
OS_Lab
OS_Lab/Assignments
OS_Lab/Programs
OS_Lab/Programs/C
OS_Lab/Programs/Python
OS_Lab/Backup
```

Explanation: Creates the required directories and verifies them using find.

Task 44 – Create the Python files

Command:

```
cd OS_Lab/Programs/Python
touch hello.py addition.py calculator.py
ls
```

Output:

```
addition.py  calculator.py  hello.py
```

Explanation: Creates three Python files in the Python directory.

Task 45 – Write and run hello.py

Command:

```
nano hello.py
python3 hello.py
```

Output:

```
Hello Linux
Welcome to Operating Systems Lab
```

Explanation: Creates a simple Python program and runs it with Python 3.

Task 46 – Create a backup archive of OS_Lab

Command:

```
cd ~
tar -czvf OS_Lab_Backup.tar.gz OS_Lab
ls -lh OS_Lab_Backup.tar.gz
```

Output:

```
Archive created; size shown as 355 bytes.
```

Explanation: Creates a compressed tar archive of the OS_Lab directory and verifies the archive file.

Task 47 – Display the size of OS_Lab

Command:

```
du -sh OS_Lab
```

Output:

```
28K OS_Lab
```

Explanation: Displays the total disk space used by the OS_Lab directory in a human-readable form.

```
xylanxd@LAPTOP-U3VEKHRD:~/Linux_Assignment/Documents$ cd ~
xylanxd@LAPTOP-U3VEKHRD:~$ mkdir -p OS_Lab/Programs/C
mkdir -p OS_Lab/Programs/Python
mkdir -p OS_Lab/Assignments
mkdir -p OS_Lab/Backup
```

Task 43

```
xylanxd@LAPTOP-U3VEKHRD:~$ find OS_Lab -type d
OS_Lab
OS_Lab/Assignments
OS_Lab/Programs
OS_Lab/Programs/C
OS_Lab/Programs/Python
OS_Lab/Backup
xylanxd@LAPTOP-U3VEKHRD:~$ cd OS_Lab/Programs/Python
xylanxd@LAPTOP-U3VEKHRD:~/OS_Lab/Programs/Python$ touch hello.py addition.py calculator.py
xylanxd@LAPTOP-U3VEKHRD:~/OS_Lab/Programs/Python$ ls
addition.py calculator.py hello.py
xylanxd@LAPTOP-U3VEKHRD:~/OS_Lab/Programs/Python$ nano hello.py
xylanxd@LAPTOP-U3VEKHRD:~/OS_Lab/Programs/Python$ python3 hello.py
Hello Linux
Welcome to Operating Systems Lab
xylanxd@LAPTOP-U3VEKHRD:~/OS_Lab/Programs/Python$ cd ~
xylanxd@LAPTOP-U3VEKHRD:~$ tar -czvf OS_Lab_Backup.tar.gz OS_Lab
OS_Lab/
OS_Lab/Assignments/
